Davidson, NC | (336) 317-7073 | djstephens6618@gmail.com | linkedin.com/in/dustin-stephens-61520ba0 | github.com/GISDusty

PROFESSIONAL SUMMARY

AI-native technical GIS leader with 15+ years of experience in geospatial systems, enterprise GIS applications, data workflows, automation, documentation, and user support. Strong background managing GIS teams, supporting technical operations, translating business needs into usable tools, and applying modern AI workflows to improve productivity, quality, and decision support.

PROFESSIONAL EXPERIENCE

GIS Project Manager / Analyst

Orbis Inc. | May 2022 - Present | Charlotte, NC

- Manage and mentor a GIS technician team, coordinate workflows, establish data-quality standards, and support repeatable service delivery for land, forestry, and SaaS GIS operations.
- Support business users and internal stakeholders across GIS applications, mapping services, data issues, workflow questions, and operational service requests.
- Maintain and troubleshoot back-end Esri mapping services using ArcGIS Server and ArcGIS Online, including service configuration, sharing, refresh workflows, and user-facing issue resolution.
- Implement data integrations into SaaS services using ArcGIS Notebooks, Python-based workflows, REST/service-oriented patterns, and practical automation approaches.
- Develop training materials, documentation, process guidance, and user support resources that help teams adopt systems and reduce dependence on tribal knowledge.
- Use AI-assisted and agentic coding workflows to accelerate prototype planning, workflow documentation, troubleshooting, and automation opportunity discovery.

Information Systems Analyst

Winston-Salem/Forsyth County Utilities | Oct. 2019 - May 2022 | Winston-Salem, NC

- Administered ArcGIS Online and ArcGIS Server/Enterprise environments supporting municipal water, wastewater, and utility operations.
- Developed and deployed custom GIS web maps and applications using Experience Builder, Web AppBuilder, and Esri web mapping tools for operational users.
- Administered Cityworks Asset Management Software and supported Esri integrations, bridging GIS, asset management, work orders, field users, and IT requirements.
- Used Python scripting, ArcPy, ArcGIS API for Python, and ModelBuilder to automate tasks, improve repeatability, and support operational workflows.
- Provided technical support and training to GIS users, field staff, and operational teams; coordinated with IT on infrastructure, access, and system reliability needs.

Civil Engineering Coordinator

City of Winston-Salem - Engineering Department | Feb. 2018 - Aug. 2020 | Winston-Salem, NC

- Managed staff responsible for GIS data maintenance, editing standards, interdepartmental data sharing, and infrastructure-related data quality.

- Communicated technical information to citizens, developers, internal departments, and engineering staff to support infrastructure decisions and workflows.

Utilities Supervisor (GIS Team)

Winston-Salem/Forsyth County Utilities | Oct. 2015 - Feb. 2018 | Winston-Salem, NC

- Supervised GIS staff implementing technology solutions for construction, maintenance, inspection, mobile GIS, and utility operations teams.
- Led training initiatives for GIS applications and mobile technology while serving as a liaison between Utilities and City Information Services.
- Contributed to GIS infrastructure planning, data model improvements, quality-control practices, and operational system adoption.

Engineering Technician / Senior Engineering Technician (GIS Team)

Winston-Salem/Forsyth County Utilities | Jan. 2012 - Oct. 2015 | Winston-Salem, NC

- Performed GIS edits, utility asset data maintenance, QA/QC, schema improvements, field workflow support, and data migration for water and wastewater datasets.

TECHNICAL SKILLS

Category	Skills
AI / Agents	Codex, Claude Code, Cursor, ChatGPT, Claude, Gemini, AI-assisted coding, agentic development workflows, LLM tooling, prompt/workflow design, human-in-the-loop review
Agent Frameworks / Harnesses	LangChain, LangGraph, OpenAI Agents SDK, Claude SDK, agent harness patterns, context control, tool use, token-cost awareness
Automation	Python, ArcPy, ArcGIS API for Python, ArcGIS Notebooks, ModelBuilder, REST/service workflows, GitHub, Docker, JavaScript familiarity
Data / GIS	ArcGIS Pro, ArcGIS Online, ArcGIS Enterprise/Server, Portal, Experience Builder, Web AppBuilder, QGIS, geodatabases, QA/QC
Databases	SQL Server, Oracle, PostgreSQL, PostGIS, schema concepts, data integration, versioning concepts, data reconciliation
Product / Ops	Requirements discovery, technical documentation, training, adoption support, stakeholder communication, support workflows, process modernization

EDUCATION

Appalachian State University, Boone, NC

Bachelor of Science, Geography - GIS Concentration | Bachelor of Science, Community & Regional Planning
